

 **King Fahd University of Petroleum and Minerals: Master's degree in Biological Sciences**

I'm Labib, a 27-year-old dedicated and engaging tutor from Jeddah, specializing in IB and IGCSE Biology. With an in-depth understanding of the subject and an interactive teaching style, I aim to instill a love for biology in my students. My academic background and the diversity of my teaching experiences allow me to approach tutoring with creativity and flexibility.

Teaches: Biology

King Fahd University of Petroleum and Minerals: Master's degree in Biological Sciences, Bachelor's degree in Biology

IB: Certification in Biology teaching in 2021

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

I've spent the last three years tutoring Biology for IB and IGCSE students. I started in a private tutoring center before branching out into online tutoring, which allowed me to reach students beyond my immediate geographical area. I've had the privilege of guiding more than fifty students in their pursuit of biology education, each with unique learning styles and capabilities.

My experiences range from one-on-one sessions to small group tutoring, where I cultivated an understanding and appreciation for the individual needs of my students. These experiences have equipped me with the expertise to adapt my teaching methods and materials to suit each student, enabling them to not only perform well academically but also to develop a genuine interest in the subject matter.

Tutoring Approach

I believe learning is an engaging and interactive process. As such, my tutoring approach involves active learning methods, often using various digital tools to enhance understanding and retention. I focus on helping my students comprehend the fundamental concepts first and then building upon those basics to tackle more complex topics.

I strongly believe in the power of questioning, encouraging my students to ask and answer questions that stretch their understanding and analytical skills. Furthermore, I provide regular progress updates and constructive feedback, helping students identify their strengths and areas for improvement.
