Qualified Tutor | PhD Applied Chemistry

I've always harboured a profound enthusiasm for both teaching and discovering novel concepts. I hold a firm belief that chemistry unveils the mesmerising beauty of our world, particularly at the molecular level. Sharing this passion with my students brings me immense joy. Witnessing the light of curiosity ignite in their eyes as another wonder of how the world operates is unveiled fills me with happiness and affirms my belief that I've chosen the correct path.

Teaches: Maths Physics Chemistry

Curriculum: IB A-Level GCSE IGCSE AP Admissions

Qualifications

MSc Chemistry and Biochemistry: Lecturer in Chemistry and Specialist in Nanobiomaterials and Nanobiotechnologies (2019-)/Bachelor's Pure and Applied Chemistry (2013-2019)

International Baccalaureate: Qualified Online Tutor (Chemistry and Biology HL/SL)

A-Level: Qualified Online Tutor (Chemistry, Mathematics and Physics)

GCSE/IGCSE: Qualified Online Tutor (Chemistry, Mathematics and Physics)

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

I have 10 years of tutoring experience. I began tutoring while still at high school; my first clients were several younger students, whom I prepared for their intermediate exams. Since then, I have become a professional tutor and have been awarded the qualification of Lecturer in Chemistry.

I teach privately using modern distant educational technologies that fulfil all the requirements of my students' syllabi, such as visualising chemical reactions and understanding theoretical concepts. These technologies include digital classroom, chemical and physical processes visualisation tools and interactive testing systems.

I also taught at several high schools in Moscow. My responsibilities included delivering lectures in theoretical chemistry, teaching the basics of chemical experiment, and coaching students for their final exams (corresponding to IGCSE). My students have successfully applied for BSc. and MSc. programmes at international and domestic (Russian) universities.

I also have experience of teaching Chemistry at IB-level with students going on to apply for places on BSc. positions in the US and China.

Over the course of my tutoring career, I have assisted a total of 50 secondary school pupils.

Currently I am tutoring several students from different European countries for their IGCSE in Chemistry, Physics, and Maths.

Tutoring Approach

Chemistry Tuition Approach

I believe that learning Chemistry is based on the two main things: understanding what exact processes are happening during any chemical or physical transformation and how we can describe them correctly using different approaches. Moreover, every single topic in Chemistry should not be regarded as an abstract thing: it is difficult to find a more practical field of knowledge than Chemistry. I devote a significant portion of my classes to honing my students' exam technique by going through numerous practice papers.

Physics and Math Tuition Approach

It is impossible to understand the logics and the mechanics of the world without Physics and Math; they represent the language we speak to nature. My main goal as a teacher is to demonstrate that Maths furnishes us with invaluable numerical, logical, and methodological tools which we can apply to a range of STEM subjects. At the same time, Physics provides us with the general understanding of how the world works and I will be able to help you uncover these fundamental principles. After nailing the content, we will focus on practice papers and exam technique, but this step should not be difficult.

Testimonials

"We are studying Physics and Chemistry for IGCSE. Elia is an exceptionally competent teacher. He is in touch with parents, I am always aware of how my children are doing. Elia is extremely interested in the success of the student. I am satisfied"

IGCSE students' parent ★★★★★

"My son faced Physical Chemistry, which was tough for him to go through. Elia has helped in several lessons. The lessons were interesting and comfortable. The most important thing is that the final control is written for a remarkably high score. I recommend this teacher with a pure heart"

A-level student's parent ★★★★★

"My son was going to apply for a position in a medical college and Elia's help was the key to his further success"

IB-level student's parent ★★★★★
