🎓 **Stanford University: PhD in Biophysics, MSc in Molecular Biology**

I've earned my PhD in Biophysics from Stanford University and have had the privilege of working on groundbreaking research in molecular biology. My passion for the subject combined with my rich research experience allows me to bring unique insights into the classroom, making Biology and Physics not just subjects but stories of the universe.

## Qualifications

**Stanford University:** PhD in Biophysics, MSc in Molecular Biology

**IB:** Biology (7), Physics (7), Chemistry (6).

## Vetted Tutor

## Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

## Tutoring Experience

Over the past 7 years, I have tutored numerous IB students, guiding them through complex topics in Biology and Physics. I have had the pleasure of seeing many of them achieve top scores in their exams and even pursue careers in related fields. Beyond exam prep, I also provide guidance for Internal Assessments and Extended Essays, ensuring students have a comprehensive understanding and appreciation of their chosen topic.

## Tutoring Approach

My teaching philosophy is rooted in inquiry-based learning. I initiate sessions by engaging students with thought-provoking questions related to the topic, allowing them to explore and articulate their understanding. Building on this, we delve deep into the subject, intertwining theoretical knowledge with real-world applications and research insights. This method not only solidifies their grasp but also sparks genuine curiosity. As we work through challenges, I emphasize the importance of perseverance, honing problem-solving skills, and critical thinking.
