McGill University: Bachelor's in Biology with Distinction

Raised in Montreal, I've always been enchanted by the complexities of biology. My teaching experiences across diverse cultures have enriched my global perspective on life's intricate details. My mission is to nurture an ecological awareness among my students, helping them understand not only the mechanisms but also the significance of biology.

Teaches: **Biology**

Curriculum: **GCSE** **IGCSE** **IB**

Qualifications

McGill University: Bachelor's in Biology with Distinction

International Baccalaureate: Qualified Instructor
(Biology and Environmental Sciences)

IGCSE: Certified Biology Tutor

Université de Montréal: Diploma in Education

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

My journey began by teaching IGCSE Biology in Seoul for a year, immersing myself in a different pedagogical environment and learning the value of a cross-cultural teaching approach. Upon returning to Montreal, I focused on IB Biology, leading both group classes and individual sessions. I've consistently found joy in watching students connect the dots, making complex biological processes feel intuitive. Over the past five years, I've had the pleasure to mentor over a hundred students, ensuring they not only ace their exams but also appreciate the broader ecological implications of what they study.

Tutoring Approach

For me, tutoring is not merely about memorization; it's about understanding, application, and passion. Every student is unique, so I adapt my methods to suit individual learning styles. My lessons are interactive and discussion-driven, encouraging questions and curiosity. We dive deep into the subject, ensuring a solid foundational knowledge while also touching upon real-world applications, especially regarding ecology and our planet's health. As a Montreal native, I also incorporate local examples and research, making the subject matter more relatable and tangible for the student.
