Hire a tutor

 **National University of Singapore: PhD in Molecular Biology**

Hailing from the vibrant city of Singapore, I've married my research background with my passion for education. This harmonious blend enables me to bring to my students not just the theoretical aspects of IB Biology, but also its real-world applications.

Teaches: Biology

Curriculum: IB

Qualifications

National University of Singapore: PhD in Molecular Biology

University of Cambridge: MSc in Plant Sciences

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

Over the last 13 years, I've been nurturing the inquisitiveness of young minds in IB Biology. My stint in research has given me a plethora of real-life examples which I integrate into my teaching, making lessons more tangible. I've proudly mentored hundreds of students, guiding them through the intricacies of the curriculum. My students often commend my ability to simplify complex processes, making them easier to grasp and remember. With a focus on exam techniques and comprehensive content understanding, many have achieved top marks and even pursued biology at tertiary levels.

Tutoring Approach

Education for me is not just about passing exams, but about fostering a genuine interest in the subject. I leverage my research experiences, using them as engaging stories to illuminate concepts. By contextualizing the information, students not only remember but understand and appreciate. Together, we tackle challenging questions, ensuring they are well-prepared for any curveballs in exams.
