

## University of Sharjah: BSc in Chemistry, MSc in Chemistry

As an accomplished Chemistry graduate from the University of Sharjah, I take pride in my love for the sciences, which I've enjoyed sharing as a Chemistry tutor for A-Level and IGCSE students in UAE. A fervent believer in the transformative power of education, I strive to impart a lasting understanding of chemistry in my students.

Teaches: Chemistry

Curriculum: A-Level

#### Qualifications

University of Sharjah: BSc in Chemistry (2011-2015),

MSc in Chemistry (2015-2017)

A-Level: Chemistry (A\*), Physics (A\*), Mathematics (A\*)

IGCSE: Chemistry (A\*), Physics (A\*), Mathematics (A\*),

Biology (A\*), English (A\*), Chinese (A\*)

### **Vetted Tutor**

# **Personally Interviewed**

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. They have extensive tutoring experience with a track record of success, helping students achieve their academic goals.

### **Tutoring Experience**

Over the last 6 years, I have successfully tutored over 200 students, clocking more than 800 hours in A-Level and IGCSE Chemistry sessions. I have honed my tutoring skills, allowing me to facilitate improved understanding, retention, and application of complex chemical concepts among students.

My student-centric approach has enabled many of my students to achieve outstanding grades, with a notable majority attaining A\* in their exams. Beyond simply teaching Chemistry, I mentor my students, guiding them through study techniques, time management, and exam preparation strategies.

I've also been involved in online tutoring, catering to students outside the UAE and across different time zones. My strength lies in my patience and adaptability to different learning styles, thus ensuring a comfortable and productive environment for every student.

# **Tutoring Approach**

I approach tutoring as a collaborative journey. At the outset, I conduct a detailed assessment of each student's strengths, weaknesses, and current knowledge. This helps me tailor a personalised study plan that aligns with their learning style and pace.

My sessions are highly interactive - I encourage students to ask questions and actively participate in problem-solving. This promotes independent thinking and boosts confidence. When tackling exam preparations, I focus on past paper questions, breaking down each problem and demonstrating the best methods for efficient and accurate responses.

I provide continuous feedback on their progress, allowing them to understand their improvements and areas that require more practice. I emphasise conceptual understanding rather than rote learning, which aids long-term retention and real-world application of Chemistry.

### **Extracurricular Activities**
