

Delft University of Technology: MSc in Applied Physics, BSc in Physics and Astronomy

Hailing from the heart of Amsterdam, my mission as an IB and IGCSE Physics tutor is to bridge the gap between theoretical knowledge and real-world application. With a fervent passion for Physics, I aim to instill a robust foundation in my students, ensuring they not only excel in their exams but also are empowered to embrace STEM careers with confidence.

Teaches: Maths Physics Chemistry

Curriculum: IB

Qualifications

Delft University of Technology: MSc in Applied Physics (2018–2020), BSc in Physics and Astronomy (2014–2018)

IGCSE: Physics (A*), Maths (A*), Chemistry (A), Biology (A*), English (A), Dutch (A)

IB Diploma: Higher Level Physics (7), Maths (6); Standard Level Chemistry (6), English (6), Dutch (7), Economics (6)

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

My tutoring journey began during my undergraduate years when I assisted classmates in grasping intricate Physics concepts. This gradually evolved into a more formal tutoring role, where I've since guided over 30 students through their IB and IGCSE Physics syllabuses over the past four years. I take pride in the fact that 90% of my students have improved by at least two grade levels, with many achieving top marks in their respective exams. One standout moment was mentoring a student who was initially at a grade 4 level in IB Physics and helping her secure a grade 7 in her finals. This transformative experience has fueled my drive to remain at the forefront of Physics education, continually refining my methods to produce such stellar outcomes consistently.

Tutoring Approach

My approach is anchored in three core tenets:

Practical Application: Physics is everywhere. I always endeavor to link theoretical concepts with real-life situations. This not only aids comprehension but also sparks genuine interest and curiosity in the subject.

Repetitive Testing: Regular mock tests and quizzes ensure that the student is always exam-ready. This repetitive testing approach ingrains knowledge and builds the confidence needed to tackle any question head-on during the real exam.

Feedback-driven: Constructive feedback is the backbone of improvement. After each session, I take time to provide comprehensive feedback, ensuring that the student understands their strengths and areas requiring more attention.
