

**Qualified IB Teacher | IB Examiner | BS Mathematics and Business**

With over a decade of tutoring experience in mathematics and business, I obtained my degree in the USA, where I had the privilege of studying under two Nobel Laureates. My tutoring approach blends a solid understanding of concepts with effective problem-solving strategies to foster deep comprehension. For the past seven academic years, I've taught mathematics and business management at an IB-continuum school. Additionally, I've gained a decade of valuable experience in finance and marketing roles at Fortune 500 companies. This dual background has enriched my expertise, seamlessly connecting academia with industry. I have extensive experience teaching Business Management, Maths, Calculus, and Extended Essay, and have served as an IB Examiner and Teacher.

**Teaches:** Business Management Maths Calculus Extended Essay

**Curriculum:** IB A-Level High School

**Qualifications**

**International Baccalaureate:** Qualified Online Teacher (Business Management, Maths, Calculus and Extended Essay)

**A-Level:** Qualified Online Teacher (Business Management)

**Highschool:** Qualified Online Teacher (Business, Maths, Calculus and Extended Essay)

**Degree Qualifications:** BS Mathematics and Business

**Vetted Tutor**

**Personally Interviewed**

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. They have extensive tutoring experience with a track record of success, helping students achieve their academic goals.

**Tutoring Experience**

Throughout my academic journey, I've had the privilege of learning from exceptional teachers at some of the world's most prestigious institutions. At Washington University, I had the honor of being taught by two Nobel laureates, Douglass North and Philip Dybvig. Even during my high school years, I was guided by outstanding math educators who not only excelled as mathematicians but also as communicators. Their emphasis on conceptual clarity, logical thinking, and rigorous learning, coupled with a personal touch of patience, laid the foundation for my educational philosophy. They instilled in me the value of language and logic as essential tools for comprehension.

My path as an educator began during my freshman year at Washington University, where I served as a Calculus Tutor. Fueled by strong academic achievements in mathematics and exceptional scores on standardized tests such as the SAT and math subject tests, I was selected as a peer tutor. Over the course of my four years at university, I successfully guided numerous students from failing grades to Bs and As in calculus.

Drawing from the effective teaching principles of my mentors, I've crafted my own approach to facilitating learning. This approach focuses on developing students' language to accurately articulate variables and their relationships, encouraging exploration of the underlying logic, and conducting concept drills and past examinations to bolster speed and confidence for high exam performance.

My academic accomplishments include earning A\* grades in O and A levels mathematics, as well as achieving outstanding scores on U.S. university admission tests, including SAT math (790/800), Math Level I Subject Test (780/800), and Math Level II Subject Test (800/800).

Throughout my decade-long tutoring career, I've celebrated significant successes, including guiding students to achieve level 7s in DP Maths HL and SL, inspiring high school students to pursue advanced math studies at the university level, assisting a student in achieving a near-perfect score of 24/25 in DP Business Management Internal Assessment (IA), and mentoring struggling students to excel in math exams. Additionally, I've provided comprehensive preparation for competition math exams and standardized tests, including the SAT and Math subject tests.

**Tutoring Approach**

My tutoring style combines understanding the basics with practicing problem-solving, making learning thorough and effective. I start by assessing where the student stands and then we set realistic goals together. During our sessions, I create a supportive environment, helping students navigate through tricky topics while boosting their confidence.

I strongly believe in open communication and encourage students to ask questions. This helps deepen their understanding and critical thinking skills. Each session is tailored to fit the student's needs and learning style, ensuring an engaging and productive experience.

Beyond just teaching content, I focus on empowering students. I want them to feel confident in their abilities and equipped to tackle challenges on their own. By taking ownership of their learning, students develop skills that go beyond the subject matter, fostering a lifelong love for learning and exploration.

**Extracurricular Activities**
