HKDSE: Maths (5**), English (5*), Chemistry (5*), Physics (5*), Chinese (5)

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

I started tutoring during my second year at university, assisting junior students with their coursework. By my final year, I had taken on several high school students preparing for their IB exams. I pride myself on the fact that all my students have improved their grades by at least one point in their Maths HL exams. I have also conducted online workshops during the summer, which were attended by over 100 students worldwide. My sessions are a mix of concept teaching, interactive problem-solving, and regular assessments. I also provide support to students applying to universities, guiding them through the complex application process and entrance exams.

Tutoring Approach

Teaching isn't just about conveying information. Firstly, I believe in creating a strong foundation, ensuring that my students understand the core concepts thoroughly. Secondly, I introduce them to real-world applications of what they learn, making the subject more relatable and intriguing. Maths can be daunting for many, but I aim to change this perception. I use multimedia tools, interactive software, and even games to make learning fun and engaging. Continuous feedback is integral to my method. I frequently discuss progress with my students and adjust my teaching methods to cater to their individual needs. I want my students to not just learn, but to develop a love for the subject.
