🎓 PGCE Qualified Teacher | IB DP & IB MYP | BSc Biomedicine

I am a dedicated, patient, adaptable, and highly enthusiastic IB DP & MYP educator, boasting extensive experience across both the international and private education sectors. With a keen eye for identifying and addressing students' individual weaknesses, I meticulously devise bespoke tutoring plans tailored to each student's unique needs. My approach not only significantly enhances their academic confidence but also rigorously improves their examination techniques, ensuring they are well-prepared and poised for success.

Teaches: Biology

Curriculum: IB

## Qualifications

**International Baccalaureate:** Qualified Online Teacher (Biology HL/SL)

**Degree Qualifications:** PGCE and Qualified Teacher Status/Secondary Science with Biology (2019-2020)/Bachelor of Science - Biomedicine (2010-2013)

## Vetted Tutor

## Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

## Tutoring Experience

At a renowned International School in London, I have had the privilege of delivering engaging Biology (both SL & HL) and ESS lessons tailored specifically for the IB Diploma Programme.

In my time there, I took on the responsibility of developing the Biology curriculum for MYP4-5, ensuring that it emphasized conceptual understanding.

Furthermore, for the younger MYP1-2 levels, I implemented an inquiry-based curriculum for Integrated Sciences. Recognizing the diverse needs of my students, I differentiated my lessons to cater to both ESL learners and those who are exceptional. Beyond the academics, I took on the role of a homeroom teacher for MYP1-2, supporting the social and emotional development of culturally diverse students.

My leadership roles didn't stop there: in 2022, I managed teaching staff as their supervisor and championed student independence in my role as the Personal Project Coordinator for MYP5. Prior to this, I had the honor of teaching at an 'Outstanding' Ofsted-rated school in London.

There, I delivered Science classes to students ranging from Year 7 to 13, adhering to the British National Curriculum.

This also included offering vocational courses specifically designed for those considering careers in health care settings.

## Tutoring Approach

I believe in the power of strong subject knowledge and effective communication. My priority is to adapt my teaching methods to cater to each student's unique needs, fostering a supportive and encouraging learning environment. Patience and understanding are at the core of my approach, ensuring that students feel comfortable and motivated to excel. Building a positive rapport with my students and providing constructive feedback are essential aspects of my tutoring style. My goal is to empower students, helping them become confident and independent learners.

I take pride in my comprehensive presentation style, which focuses on two key objectives: improving exam performance and fostering a genuine love for learning. I hone in on areas of weakness and empower students to face and conquer them. I initially start by sending my students diagnostic checklists or quizzes to assess prior learning to make the most effective use of our time. Having a tutor is truly a collaborative process and takes teamwork to succeed.

In online lessons, I utilise collaborative whiteboards to create an interactive and inclusive environment that enhances students' understanding and engagement. Through personalised activities and quizzes, I tailor the learning experience to address individual progress, boosting students' confidence in exam preparation.

For in-person sessions, I bring dynamic lessons with a variety of resources, igniting students' passion for the subject matter. Moreover, I cultivate a supportive atmosphere that encourages students to explore and be creative, creating a positive and safe space for learning.

My well-rounded approach ensures active participation, effective exam readiness, and a profound love for learning that extends far beyond assessments, empowering students on their academic journey.
